Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-19, drawn to breast prosthesis, classified in class 623, subclass 7.
- II. Claims 20-26, drawn to a process for manufacturing a breast prosthesis, classified in class 249, subclass 55.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Group II and Group I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the prosthesis of group I does not require the specifics of the method steps of group II. The prosthesis of group I does not require the steps of passing a curable elastic material precursor through the second fill opening and partially filling the first interior volume by passing a self shaping dispersion through the first fill opening.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Charles Fails on 7/1/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
